

KNIVES AND ANVILS

LAKO is dedicated to manufacturing all forms of custom and OEM Knives and Anvils for horizontal wrappers and vertical bagging machines.

Knives are available in many styles, including but not limited to:

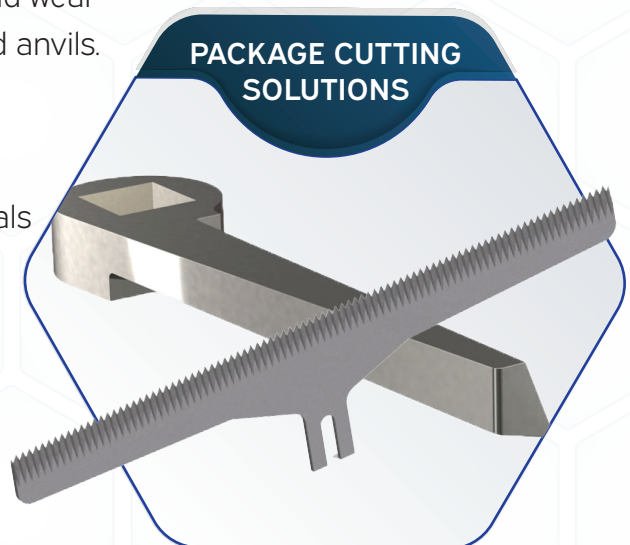

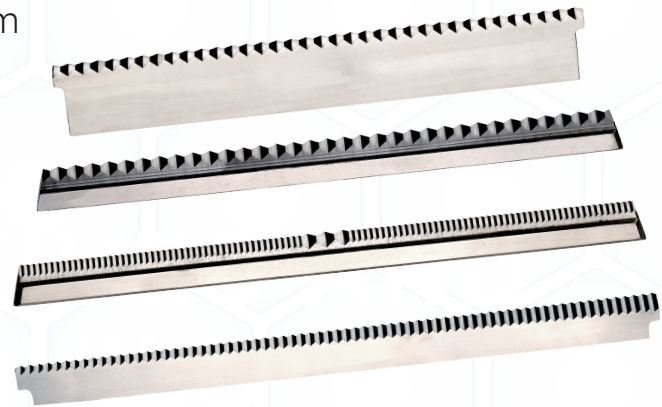

- Zig-zag Knives for easy-open applications
- Diagonal Knives to aid in reducing cutting force
- Straight Knives
- Fly-thru Knives

LAKO uses only the finest materials to provide impact strength and wear resistance, providing our customers with longer lasting knives and anvils.

LAKOTE 85 COATING FOR KNIVES AND ANVILS

Lakote 85 coating along with Lako's premium knife & anvil materials makes for a superior product, eliminating chipping, cracking, and breakage common with carbide. Lakote 85 coating offers cost-effectiveness due to longer lasting knives and anvils.

- Offered for horizontal knives, anvils and fly-thru knives
- Challenges carbide knives and anvil competitively in edge strength, wear resistance and durability
- As strong as carbide but more cost effective
- Longer lasting knives and anvils reduce part changes and adjustments

HORIZONTAL ROTARY KNIFE EDGES

- Straight
- Diagonal
- Standard Zig-Zag
- Diagonal Zig-Zag
- Multi-Pitch Zig-Zag
- Perforating

VERTICAL BAGGER FLY-THRU KNIVES

- Scalloped Tooth
- Serrated, Coarse Tooth
- Serrated, Fine Tooth

COMPLETE ENGINEERING AND DESIGN SERVICES

- Diagnostic assistance for manufacturing issues
- Design change or improvements
- Full circle project development and follow-up
