

MSD™ CRIMPERS

LAKO TOOL's revolutionary crimper design provides the ability to quickly change the seal insert, or replace damaged heaters without disturbing the initial machine setup.

QUICK-CHANGE SEAL JAW

- Minimize loss of production
- Easy heater access with split hole design
- Hot and Cold applications
- Changes easily between standard sealing and hole punching applications
- Easy ability to change WOS and LOS with different inserts
- Replace a failed heater and not have to reset the crimper or the knife cut
- Return exactly where production left off

ADVANTAGES OF THE MSD CRIMPER

- Replace the sealing surface without removing the crimper base and disturbing the initial machine setup
- Precise, interchangeable, **Quick-Change** seal inserts can be replaced in minutes
- Easy heater access with split heater design eliminates lost production due to heater failure
- Available with shim style or adjustable knife

ELIMINATE DOWNTIME AND INCREASES PRODUCTION!

Worn or damaged MSD Quick-Chang Inserts are replaceable in four easy steps:

- STEP 1** Remove upper and lower inserts
- STEP 2** Clean crimper-base top surface
- STEP 3** Install new upper and lower inserts, with knife and anvil
- STEP 4** Set knife according to standard procedure
